

THESIS PROJECT

DESIGN ROOFTOP VEGETABLE GARDEN AT LE MAT HOTEL

CLIENT

Le Mat in Jonsereds fabriker is a newly built hotel with 27 bright and well-planned rooms, comfortable lounge and conference facilities. Here you have the opportunity to relax and recreate in Natura 2000 areas and Jonsered's gardens, bath in the Aspen lake, but you are also close to shopping and entertainment.

Le Mat is an international franchise for social co-operatives. All Le Mat hotels, hostels and B&B's work to employ and include people experiencing social exclusion due to unemployment, disability, mental illness or other reasons – all while delivering great, genuine and honest service to the guests.

TASK

Le Mat has a rather big roof, visible from several rooms of the hotel. It is an unused space and a dull view for the rooms facing the roof. La Mat now wants to transform this roof into a beautiful lush garden, capable of supplying greens to the hotel kitchen. Thus, the roof top garden has a two-fold aim: 1) to increase the amount of locally sourced greens to the restaurant and 2) to create a beautiful and inspiring view from the rooms facing the roof.

Your task is to design this rooftop garden, having sustainability as a key design aspect throughout your work.

Final delimitations are made in consultation with the thesis supervisor and contact person at the client. Both student and client should be aware that academic relevancy is mandatory.

Prerequisites

The thesis project is suitable for students within the field of design or architecture.

Scope

Preferably graduate (master's) thesis, 30 hec, however the project could be adapted to bachelor level (15 hec).

Location

Partille

Reimbursement for travel expenses within Västra Götaland

Ja
