

THESIS PROJECT

DESIGN MILJÖBRON'S NEW BACKOFFICE SYSTEM

CLIENT

Miljöbron is Sweden's oldest and largest professional organization for business-student collaborations within sustainability. With offices in Västra Götaland and Skåne, we engage some 500 students and 200 companies in projects where they tackle a sustainability challenge together. During the past 20 years Miljöbron have supported, above all, small to medium size enterprises with in the development of their sustainability work. Our collaboration projects have brought together more than 4000 students and 1500 businesses.

TASK

Miljöbron Västra Götaland is a team of five co-workers who administrate a large number of collaboration projects. Each employee manage around 40 projects per year. Even though the subject and content of each collaboration is different, the process for each project is very similar. Currently our processes include a lot of correspondence and document handling on different platforms. We would like to combine as much of this as possible in one platform, with automated connections to a front end website.

The purpose of this thesis project is to help us design the system. We are open to different methods. However, we picture some sort of user analysis, solution benchmark, design and, if possible, implementation.

Final delimitations are made in consultation with the thesis supervisor and contact person at the client. Both student and client should be aware that academic relevancy is mandatory.

Prerequisites

The thesis project is suitable for students within the field of ICT.

Scope

The project can be adapted to Bachelor or Master level, 15-30 hec.

Location

Göteborg

Reimbursement for travel expenses within Västra Götaland

Yes
